CONTENTS OF VOL. X. (Nos. 37–40)

NUMBER 37—JANUARY

Page

The Ordinary Transport Properties of the Noble Metals. By J. M. Ziman, Cavendish Laboratory, University of Cambridge 1

The Many-body Theory of Electrons in Metal or Has a Metal Really Got a Fermi Surface ? By L. M. Falicov and V. Heine, Royal Society Mond Laboratory, Cambridge 57

NUMBER 38—APRIL

The Theory of Impurity Conduction. By N. F. Mott and W. D. Twose, Department of Physics, University of Cambridge 107

The General Theory of Van der Waals Forces. By I. E. Dzyaloshinskii, E. M. Lifshitz and L. P. Pitaevskii, Institute of Physical Problems of the U.S.S.R. Academy of Sciences, Moscow . . 165

NUMBER 39—JULY

The Theory of Nuclear Matter. By J. S. Bell, CERN, Geneva and E. J. Squires, Department of Applied Mathematics and Theoretical Physics, Cambridge 211

NUMBER 40—OCTOBER

Methods of Measuring Debye Temperatures and Comparison of Results for some Cubic Crystals. By F. H. Herbstein, National Physical Research Laboratory, Council for Scientific and Industrial Research, Pretoria, South Africa 313

The Theory of the Interaction of Electrons with Lattice Vibrations in Metals. By G. V. Chester, Department of Mathematical Physics, The University, Birmingham 357

Crystal Stability and the Theory of Ferroelectricity. Part II. Piezoelectric Crystals. By W. Cochran, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 401
